

Vontas Cloud

Save time and money – host and manage your Vontas infrastructure in the cloud.

Agility is key to protecting service levels and implementing your vision of what transit should be for your communities and riders. Moving your software operations to the cloud provides a flexible business environment to respond quickly and more effectively when change happens, setting up your agency for continued success.

Vontas Cloud adopts innovation and shortens time-to-market for services that enhance the passenger experience, while reducing your transit IT infrastructure costs.

More than just a cloud solution, it's peace of mind – so you can focus on what matters most – your business.

Overview

Get Full IT Support

- Assumes responsibility for cloud-specific tasks such as security management, back-up and disaster recovery, monitoring (app, infrastructure, and network), automation, policy management, cost management etc.
- Improves support cycles with 24/7/365 servicing from system experts who can make informed decisions about your cloud environment.
- Lighten the workload from your in-house team for monitoring operations around the clock, troubleshooting & diagnosis issues, or recovering from a system outage; significantly reduces issue resolution lifecycles.

Pay for What You Need

- Enables you to develop an IT resource plan tailored to your needs.
- Automatically scales resources up or down, based on demand; eliminates idle server time.
- Subscription pricing better utilizes your IT spend.
- Reduces the size of your on-premises infrastructure, or data center or eliminates it altogether.

Scale Up and Out

- Optimizes resources with on-demand scalability to meet your business needs.
- Enhances workplace flexibility with access anytime, anywhere to the cloud; facilitates faster technology integrations between departments.
- Reduces friction during cloud migration by handing off responsibility to a single provider instead of potentially costly arrangements with multiple organizations.

Agency Benefits

Reduced Infrastructure Costs

Vontas Cloud lowers the cost of ownership for your IT environment, maximizing network efficiency with minimal capital expenditure and upgrading costs. Having a lean financial structure, a robust, scalable platform, and expert technical support gives your agency the agility to enhance technology planning and drive innovation for the future.

Better Risk Management

Disaster recovery measures include a secure data center near your place of business and a secondary center in a geographically separate region. Vigorous back-up processes mean less downtime during disruptions and minimal data loss. With the expertise to access, monitor, and resolve issues quickly with cloud-managed services, your response times improve, to your passengers' benefit.

Faster Deployment

Planning, installing, and testing new on-premises hardware and software can take months, delaying the benefits to your agency of technology uptake. Cloud enables you to utilize your new tools to improve service in weeks, even days, improving your agility to address transit challenges.

Increased Security and Compliance

Cybersecurity is a paramount concern for cloud service providers, who perform regular security audits to help ensure data and sensitive information are fully safeguarded and secure. Cloud vendors can provide an environment compliance audit for frameworks such as HIPAA.

Passenger Benefits

Fewer Disruptions

- Minimized downtimes help prevent delays to service, increasing passenger satisfaction.

Safer, More Reliable Service

- Accelerates new technology adoption, bringing service innovations to market faster.
- Helps meet your compliance requirements, facilitating funding requests that improve service.

Stronger Privacy Protection

- Stringent technical and administrative controls to safeguard passenger data.
