# Vontas OnRoute Supervisor

Keep your vehicles on track and on schedule

OnRoute Supervisor uses OpenStreetMaps to show where your buses are located.

Vontas OnRoute Supervisor is a modernized, web-based application that tracks vehicle movement and incidents. Allowing supervisors to engage with dispatch and operators during operations by providing dynamic assistance and ensuring routes stay on schedule. Get rid of time-consuming tasks and human error and switch to a tool that your dispatchers can use to keep track of your services and keep your buses running on time and on-schedule With a secure connection, run on a laptop in the office or on a tablet out in the field.

By integrating with Vontas OnRoute, Supervisor utilizes real-time information and provides a clear overview of information on your fleet that can provide insights to your agency and be passed along to your riders. With Supervisor, you can keep your operations moving for riders and operators.

Overview

Real-Time Tracking Information

- OnRoute Supervisor provides a wide overview of real-time information on your vehicles.
- Whether it's a laptop in a vehicle, or on a tablet out in the field, you can track your fleet and know where your buses are and how they are running on schedule.
- Keep your routes on time and avoid missing buses due to vehicle breakdowns, lack of operations, or a bus running early.

Keep Track and Secure Data

- OnRoute Supervisor uses OpenStreetMaps to show where your buses are located.
- Application includes a Vehicle Tab that has a menu with details on your fleet.
- View information on each bus with data that is customizable to your agency.
- Search by Bus Number, Operator, Route, etc.
- Keep track of when buses are arriving, leaving, on-time, behind schedule, etc.

Create Service Disruptions On the Move

- Draw the detour path on a map from your tablet device.
- After creating the detour, have your system record it and it will auto-generate it for future rides.

Agency Benefits

Keep Buses On-Time

Keep your operations running on-time and prevent buses from running late or behind schedule.

Bridge the Communications Gap

Bridge the communication gap and eliminate guess work. Know where your buses needs to be and who needs help.

Remote Access Anywhere

Access Supervisor from any location with a secure connection and keep track of your vehicles, whether you're in the field, in the office, or even at home.

Passenger Benefits

Accurate, Real-Time Passenger Information

Utilize the data you gain from Supervisor to make decisions that improve and enhance the service for your riders.
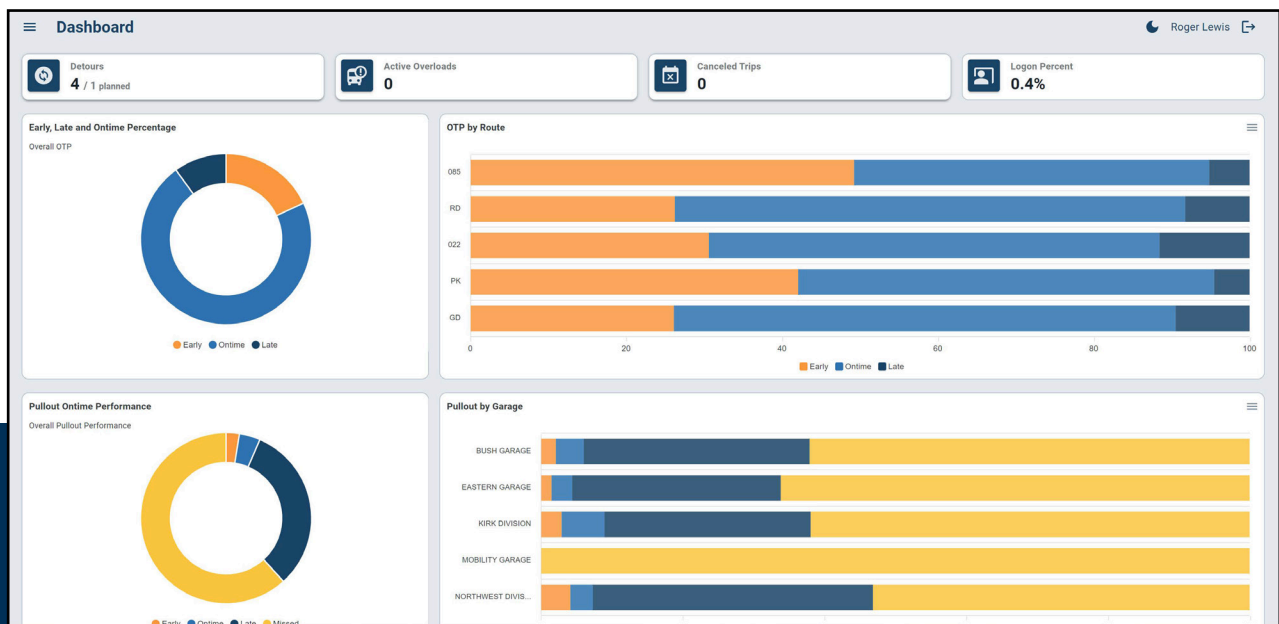

Reliable Service During Unexpected Events

Retain your passengers' trust by efficient service in the wake of an unexpected event where buses need to go elsewhere and changes are made to the schedule.

Communicate Service Disruptions

By communicating disruption, your riders will have more confidence in your service and be able to plan their day accordingly.
